Overview

Who we are

Toyota Manufacturing is looking to develop new innovative solutions to support the future of mobility, and values being a member of a local and community. We offer an inclusive team environment that values "respect for people" and we are a company with a rich history and an exciting future for your professional dreams. Along with great pay, amazing benefits, and a stable work environment – Toyota Manufacturing has it all.

To save time applying, Toyota does not offer sponsorship of job applicants for employment-based visas or any other work authorization for this position.

Who we're looking for

Toyota's Environmental & Facilities Department is looking for a passionate and highly-motivated Senior Engineer.

The primary responsibility of this role is to manage construction projects (expansions, renovations, greenfield, etc.) at North American manufacturing Research & Development Sites, and Logistics and Distribution sites.

Reporting to the Manager – Facility Projects, the person in this role will support the Environmental & Facilities department's objective to provide project management, construction, and building design to ensure projects are designed and built to quality, cost, schedule, and safety KPIs for North American manufacturing sites, Research & Development Sites and Logistics and Distribution sites.

What you'll be doing

- Project Leader for new Toyota Battery Manufacturing North Carolina greenfield construction project.
- Develop criteria (mechanical, electrical, fire protection, civil/structural, etc.) for the design of buildings.
- Provide technical support to North American Manufacturing plants in the areas of building design and construction, including the development and maintenance of building-related standards.
- Act as Subject Matter Expert for industrial buildings and building-related systems as technical support for local facility groups at each site, as well as submittals during project management.
- Provide experience in plant planning project management, construction, and building design to ensure projects are designed and built to quality, cost, schedule, and safety KPIs.
- Mentor engineers, construction coordinators, and other project personnel to increase their skillset in industrial construction.
- Create Customer Satisfaction with proper communication and consensus with customers to support their needs.

What you bring**Careers** (<https://careers.toyota.com/us/en/search-results>)

- Bachelor of Science (Engineering: Mechanical, Civil, or Structural).
- Experience in building design and construction.
- **Culture** (<https://careers.toyota.com/us/en/culture>)
- Experience in building design and construction related systems.
- Experience in project management of industrial construction projects with a value of \$20M+.
- Experience in people management.
- **Perks** (<https://careers.toyota.com/us/en/perks>)
- Intermediate-level experience in computer skills (AutoCAD, Microsoft Office – Word, Excel, PowerPoint, Visio, and Outlook).
- This position requires driving. A motor vehicle record that's acceptable by company standards is required for this position.

TOYOTASaved jobs (0) (<https://careers.toyota.com/us/en/>)**Students** (<https://careers.toyota.com/us/en/students>)**Added bonus if you have**

- Professional Engineering (PE) License.
- **Events** (<https://careers.toyota.com/us/en/events>)
- Experience in industrial mechanical systems (piping, chilled water, compressed air, etc.).
